

GLOBE WEST

PROJECT PROFILE

Project Overview

Company: Globe West

Industry: Furniture Supplies

Location: Parsons Avenue,
Springvale

Size: 476 square metres

Features Installed:

- Automated Gate

GLOBEWEST

The Problem:

Single layer of larger boxes being stored with each other.

The Solution:

Mezzanine storage area.

The Problem

Due to the nature of their stock, GlobeWest had a vast amount of bulky inventory. The business was finding it hard to find adequate areas to store these without heavy stock having to be piled onto smaller pieces of stock.

GlobeWest only had access to a small area to store these pieces, and as the business grew this area became far too small to hold the stock safely. Therefore GlobeWest required a larger storage area to ensure all of their inventory could be stored safely.

The Solution

Heighton Mezzanines took GlobeWest through their hassle-free mezzanine installation process. Early discussions and analysis of the GlobeWest warehouse lead to the solution of a mezzanine storage area. This solution provided room for the bulky items of stock by providing adequate room for them to be stored.

An automated gate and staircase were also added during the installation of the mezzanine. These aspects provide easy access and element of safety to the mezzanine.

The Outcome

After the installation of the storage mezzanine, GlobeWest's warehouse had maximum storage capacity.
